

This is an extract from NOGEP A Standard 001

Appendix 8 Request for Dispensation

(Extension to an expired safety/emergency response training certificate)

Operating companies and contractors should make all reasonable efforts to ensure that safety and emergency response related refresher training is completed before the individual's current certificate expires. In case of unforeseen circumstances such as illness or abnormal work demands the individual may extend the currency of the current certificate by up to 3 month.

The consent for such an extension may only be given by NOGEP A on behalf of the Management of the Operating Company by using the completed form "Request for Dispensation", which can be found on the next page.

Please note that:

- Extension will only be granted to personnel who have completed the basic course and at least one related refresher course of the subject training.
- Extensions will not be granted to visitors or personnel who work offshore occasionally.

Where an extension is granted the effective start date of a new refresher training certificate will be the expiry date of the individual's corresponding current certificate (back dating).

*Please note that Refresher courses could also be taken from 3 months before the expiry date (no need for dispensation). The entrance date of the refresher period **could** be taken as the expiry date from the previous course (forward dating).*

This form is to be completed by the requester and submitted by email to the NOGEP A secretariat.
